

THE CHENG POST

Welcome to Cheng Plastic Surgery, Medspa and Hair Restoration

CARING FOR YOU THE CHENG WAY

At Cheng Plastic Surgery and Medical Spa, our "family" is an essential aspect of who we are and what we do each day. Our practice embodies not only our Doctors but also our staff that share a common passion and purpose to impact others in a genuine, lasting way. Each patient that enters our office becomes a part of our family.

Whether you are ready to embark on a surgical journey or want to slow the aging process with non-invasive procedures and injectable treatments – our number one priority is always you! We strive to help you achieve your highest level of aesthetic confidence physically, mentally, and emotionally as well. We appreciate your trust and continued support over the years. You inspire and motivate us each day and we are so excited for what the future holds!

"I WOULD HIGHLY RECOMMEND THE CHENG'S TO ANYONE. MY FAMILY AND FRIENDS NOW COME HERE AS WELL. I HAVE BEEN COMING TO BOTH DR ELBERT CHENG AND JACQUELINE CHENG FOR OVER 7 YEARS. I FEEL THAT YOU GET TWO SURGEONS WHO ARE KIND, PATIENT AND KNOWLEDGEABLE. THEY TRULY CARE ABOUT THEIR PATIENTS."

PUT YOUR BEST FACE FORWARD WITH THE CHENGLIFT

There are many variances in facelift techniques, but the renewal of the **Deep-Plane Facelift** has added to our ability to sculpt the face and neck. We can now improve, even more, on the existing structures of your face to provide a more youthful, sculpted, and refreshed appearance.

As we age, our cheeks and jowls begin to sag, creating heaviness in our lower face. The Deep-Plane Facelift specifically targets these aging regions to create a more fresh and refined appearance to the face while defining and highlighting the cheeks and jawline.

We are fortunate to live in a time of tremendous advancement in technology. Occasionally, technology comes along which drastically alters our approach to surgery by minimizing recovery time and incisions. **Renuvion®** is one of these technologies. This procedure is designed to tighten the skin in the lower face, neck, and brows and can be combined with liposuction for further contouring.

Renuvion® is extremely safe and quickly tightens large regions of tissue without removing any skin. (When performed alone, the healing and recovery time is typically short, with minimal discomfort.) Renuvion® delivers plasma (helium gas and electrical current) underneath the skin to help cause tissue contraction. This procedure can be performed in addition to a facelift or as a stand-alone procedure!

If you are bothered by how aging is changing your face and neck, please schedule a complimentary consultation with Dr. Elbert Cheng or Dr. Jacqueline Cheng. Starting with an exam and a careful assessment of your goals, we can create a plan to help you look refreshed!

"Growing old gracefully was just not for me, so when I decided to do something about it I made sure I went to the best. Dr. Cheng and the team did an amazing job and I am thrilled with the result. I mean really, when it comes to your face you just don't take chances."

-Real Patient. Real Results.

NOT READY FOR A FACELIFT? CHECK OUT OUR LESS-INVASIVE ALTERNATIVES!

Submental Liposuction - Submental liposuction removes fat from under the chin and is perfect for someone who is looking to get rid of their double chin. Only a very small amount of skin is removed. Submental liposuction can be combined with Renuvion to contour the jawline for someone who has more fullness and mild laxity of skin.

MINT™ PDO thread lift -MINT™ thread lift uses PDO threads with barbs. These threads are placed beneath the skin through small incisions to lift skin that has sagged. No skin is removed. The tissues are just repositioned by the threads into a higher position, this procedure is for patients who have mild to moderate laxity of skin. The PDO threads do dissolve over time and stimulate collagen production. The results of the MINT™ thread lift can last up to a year and are subtle when compared to a facelift and necklift.

Thermage® FLX and Ultherapy® - Thermage® FLX and Ultherapy® are truly noninvasive, no downtime procedures that use different forms of energy (radiofrequency for Thermage® FLX and focused ultrasound for Ultherapy®) to stimulate collagen production. Results vary by individual and are dependent on the amount of collagen produced. Since no skin is removed or lifted, these procedures are more preventative to slow down the aging process and are best suited for patients who are just beginning to notice laxity of their skin.

Thermage®FLX and Ultherapy® can also be performed after a facelift to maintain results.

Your options other than facelift are really dependent on how much laxity of skin you have, and what results you would like to achieve. To determine what procedure is best for you, schedule your complimentary consultation today!

MAKE YOUR BOTTOM A TOP PRIORITY WITH QWO™

At Cheng Medspa, we are always looking for the most innovative and results-driven treatments on the market. We are so excited to offer QWO™, the first and only injectable cellulite treatment for the buttocks!

QWO™ is administered in a series of up to three treatments spaced 21 days apart. Bruising and some discomfort is expected, but there is no downtime.

When QWO™ is injected into the area beneath a dimple, it stimulates the inception of Enzymatic Subcision and Remodeling (ESR™). ESR™ involves the enzymatic breakdown of collagen-rich fibrous septae, which play a vital role in the makeup of cellulite. By dissolving these subdermal fibrous structures, QWO™ causes the release of cellulite-associated skin depressions (dimples) and smooths the skin's surface. In addition, QWO™ stimulates the production of new collagen molecules, which further improves the appearance of the skin.

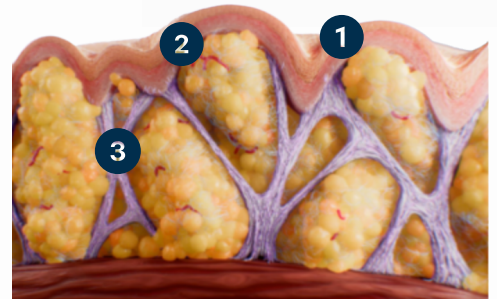

Within about 28 days of your last treatment, your skin will be smoother and tighter, and cellulite dimples will begin to disappear!

To see if QWO™ is the right treatment for you, call us today to schedule your complimentary consultation with one of our providers. *Nurse Alex* and *Nurse Teresa* can't wait to hear from you!

What does cellulite really look like?

- 1. Dermal Thinning
- 2. Fat Lobule Protrusion
- 3. Fibrous Septae

QWO™ at Cheng Medspa is the world's first and only FDA-approved injectable for the treatment of cellulite.

WHAT'S NEW AT CHENG MEDSPA?

We are so happy to announce that we now offer **The Murad® Retinol Hydrafacial™ booster!** This booster works to accelerate the renewal of the skin's surface. It instantly plumps to minimize the appearance of wrinkles while evening skin tone and boosting youthful radiance.

Have you heard about our new **High Frequency Facial?** This high frequency device uses small currents to oxygenate the skin, increase circulation, reduce inflammation, and heal emerging pimples! The high frequency facial softens wrinkles while simultaneously killing acne-causing bacteria.

Curious if these treatments may be right for you? Call our office at (408)255-3223 to book your complimentary consultation with our *Medical Aesthetician Nam!*
